

Research institute and thinktank. With five locations in four countries, WifOR has already realized over 260 projects in more than 20 countries worldwide. Since more than 10 years, we provide accurate, insightful, and objective analytics & research that guides decision-making to companies, associations, government organizations, and NGOs. As a dynamically growing company we are looking for new innovative team players.

**We are searching for a senior health economist
with several years of work experience to join our health economics team in
Darmstadt, Germany, as soon as possible**

Position duties:

- Leading and conducting health economic research and consulting projects
- Development of new concepts and methodologies; implementation of advanced statistical approaches
- Communication and presentation of project results to national and international customers

Position requirements:

- Masters or doctoral degree (or equivalent experience) in economics, public health, social sciences, or other relevant discipline
- 5+ years of experience working in applied health economic research
- Strong foundation in quantitative methods, including statistical programming skills, and broad understanding of health policy issues
- Ability to provide task leadership and coordinate the work of teams
- Strong organizational skills, flexibility to lead and manage multiple priorities

What we offer:

- Interesting and diverse duties in an international environment
- A strong research network and close collaboration with public- and private-sector partners
- Flexible working time in a team-oriented work environment
