

Research institute and thinktank. With five locations in four countries, WifOR has already realized over 260 projects in more than 20 countries worldwide. Since more than 10 years, we provide accurate, insightful, and objective analytics & research that guides decision-making to companies, associations, government organizations, and NGOs. As a dynamically growing company we are looking for new innovative team players.

We are searching for a health economist to join our health economics team in Darmstadt, Germany, as soon as possible

Position duties:

- Conducting health economic research and consulting projects
- Communication and presentation of project results to national and international customers

Position requirements:

- Master's degree in economics, public health, social sciences, or other relevant discipline
- Interest in applied health economic research
- Proficiency in MS Office; statistical programming skills (Stata, R, Python) are a plus
- Ability to work in a team
- Open to new challenges

What we offer:

- Interesting and diverse duties in an international environment
- A strong research network and close collaboration with public- and private-sector partners
- Flexible working time in a team-oriented work environment
- Support in writing a dissertation (if aspired)
